

## Beginner Sewing Lab 102

### "Cut, Mark and Fuse"

#### **Class Outline**

#### Pattern pieces and symbols; what they mean

Learn to decipher the symbols and markings on your pattern.

#### Layout charts and how to read them

How to correctly position your pattern pieces for cutting.

#### Getting your fabric ready to cut

A review of pretreatment; correct positioning of fabric on the cutting surface.

#### Grain lines

What is a grain line? Why is it important?

#### Lay out your pattern accurately!

Use the pattern markings and your grain lines to position the pattern for accurate cutting.

#### Cutting and organizing

Cutting order, and how to keep the pieces organized for sewing.

#### Applying the interfacing

Choosing which pieces to interface ; how to apply interfacing correctly.

#### Marking the pieces

Marking methods, what to mark, why we mark after the interfacing is applied?

#### Testing the fabric

Test-stitch samples of the fabric.

#### Homework; notebook entry with sample

Making note of any challenges, comparison samples.
